## Twelve Times Tables

$0 \times 12 = 0$

$1 \times 12 = 12$

$2 \times 12 = 24$

$3 \times 12 = 36$

$4 \times 12 = 48$

$5 \times 12 = 60$

$6 \times 12 = 72$

$7 \times 12 = 84$

$8 \times 12 = 96$

$9 \times 12 = 108$

$10 \times 12 = 120$

$11 \times 12 = 132$

$12 \times 12 = 144$

Have a go at some questions:

- 1)  $2 \times 12$
- 2)  $6 \times 12$
- 3)  $8 \times 22$
- 4)  $10 \times 12$
- 5)  $11 \times 12$

Cool ★ fact: When you add up the digits in a number from the 12 times tables, they always add up to a number in the 3 times tables! E.g.  $144 = 1+4+4 = 9$

Stretch your brain!

- 1) There are 5 big tables at a party and each has 12 balloons on it. How many balloons are at the party? Fill in the numbers:

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

- 2) Every month, Henrietta the goose lays 12 eggs. How many eggs does she lay in one year? Fill in the numbers:

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$
