Division - Sharing

Sometimes we can use pictures to help us divide. This is called SHARING.

Here there are 6 lollipops and we are going to share them into groups of 2.

There are 3 groups, so:

$6 \div 2 = 3$

Share these cars into groups of 5

$10 \div 5 =$ ☐

Share these rainbows into groups of 2

$14 \div 2 =$ ☐

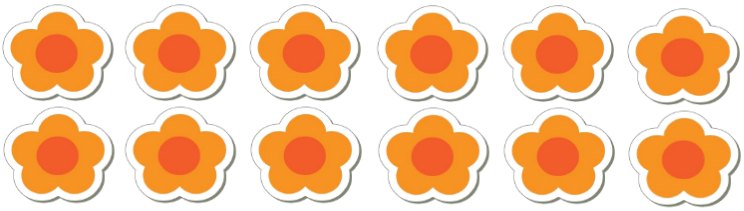
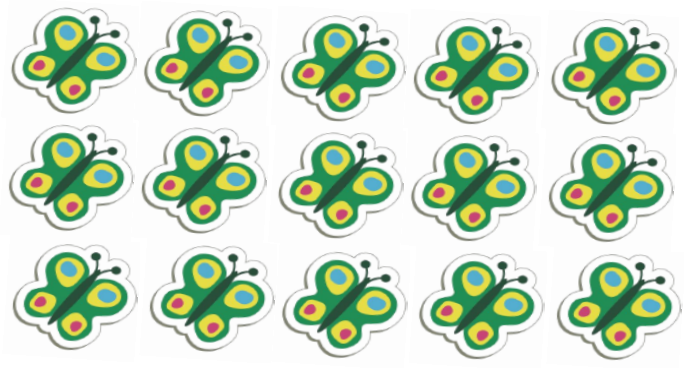
Share these flowers into groups of 3



$12 \div 3 = \square$

Use the pictures to help you do the sums.

15 ÷ 5 = _____



16 ÷ 2 = _____

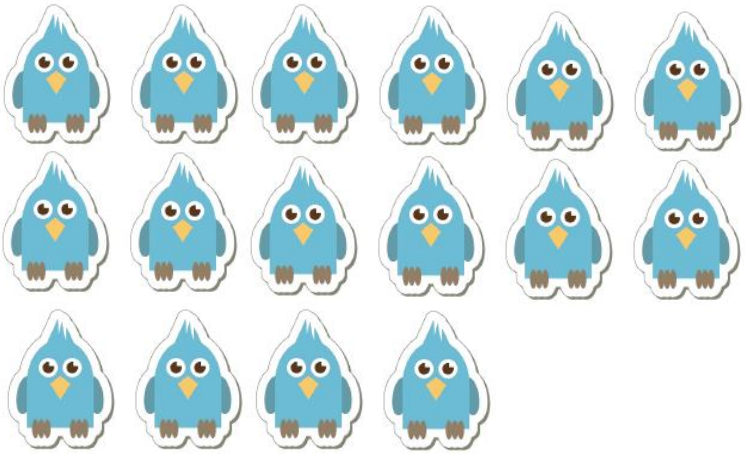
16 ÷ 4 = _____



18 ÷ 6 = _____

20 ÷ 2 = _____
