

Making Sums of Money from Coins 2

Work out which coins are needed to make the given amount of money.

E.g. Which three coins add together to give you 16p?

Now try these examples:

1) Which three coins add together to give you £1.52?

2) Which four coins add together to give you 28p?

3) Which four coins add together to make 66p?

- 4) Which five coins add together to give you £2.81?
- 5) Using £1 you go and buy some sweets which cost 75p. Which two coins are you given as change?
- 6) You have £2 which you use to buy a magazine and a chocolate bar. The total cost is £1.59. Which three coins are you given as change?
