Halves and Quarters

A half is written $\frac{1}{2}$ and a quarter is written $\frac{1}{4}$

When you split something into halves, it means you split it into 2 equal sections:

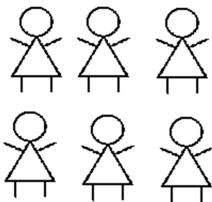

A quarter is half of a half! So, there are always 2 quarters in 1 half. So split something into quarters, you split it into 4 equal sections (or split in half, then split in half again):

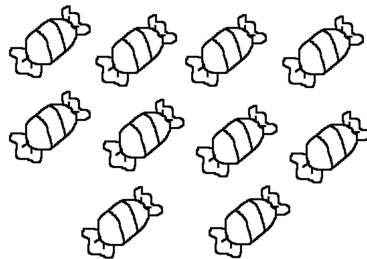

Time to practise!

Colour in $\frac{1}{2}$:

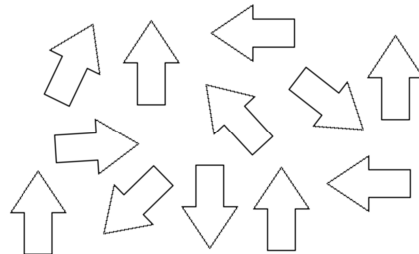

1)

2)

3)

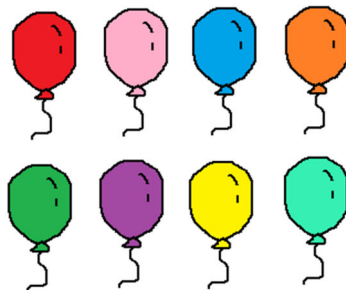

Circle $\frac{1}{4}$:

1)

2)

3)
